Incorrect Question #	Why is my answer incorrect	Why is this the correct answer
1	The C is incorrect because equilateral and the isoceles are switched	B is the correct answer because it's saying if it equilateral, then it is isocelles.
3	My choice p→q is wrong because that choice does not match with what it is saying	p→~q is the correct answer because the (q) part is inverse
4	C is wrong because, the construction does not show it is "congruent to a given line segment	D is right because the construction shows it is perpendicular in the image
9		D $L_1 = m = 2$, $L_2 = m = -\frac{1}{2}$
