how about time.

Reading Test:

6/10
In this article from guardian the author talks about the amount of reruns that Hollywood movies are getting. There have been countless reruns in the movie industry including La Totale, Evil Dead, and soon to be How to Train Your Dragon. According to DreamWorks employees How to Train Your Dragon: Homecoming will be released on March 14, 2025. This movie does not have much hype or excitement around it because it is supposed to be a rerun of the first How to Train Your Dragon. People also speculate that other movies like Shrek and Wall-E will have reruns in time.

Vocabulary Test:

Writing Test:

Intro is missing... sort of TJ

~~There are many reasons why I would like to study at TJ including the fact that their~~ courses give a wide variety of career opportunities that I could pursue. Another reason is that on my record which is where colleges look it will say that I attended the best high school in the country. I would also like to study here because of the amount of creativity that can be used in the S.T.E.M courses. My brother goes to TJ so I know a little about the school and he told me that lots of the summatives are group projects that help you work your teamwork skills. My last reason for why I want to study at TJ is the fact that the courses there are much harder than the school that I am supposed to go to. These hard courses help me learn more and can help me with my future job.

Math Test:

0 1/2
✓
1/1
I know that Juline danced for 2 hours and 15 minutes in 2 days. I also know that she danced 2 times more on Monday than she did on Tuesday. This helps me realize that there are basically 3 parts of her dance practice. 2 of them were on Monday and 1 of them were on Tuesday. With this information I divided 2 hours and 15 minutes or 135 minutes by 3 and I got 45 minutes. So now we know that she danced for 45 minutes on Tuesday and 90 on Monday. Juline practices her dance routine for 90 minutes on Monday.

Science Test:

7: C ✓

8: J ✓

9: C ✓
