

R-16	I put answer choice B while the correct answer was C, C is the correct answer choice because the question was asking what the passage indicates about the gift givers, which is that their idea is incorrect. I had chosen B instead because I didn't read the exact portion of the passage where it indicates that the gift-givers assumption is incorrect.
R-21	I put answer choice D while the correct answer was A, A is the correct answer choice because the passage constantly reiterates the fact the people fail to change perspectives from gift giving to gift receiving. I had put D because I inferred that the misunderstanding of intentions was the only reason for the disconnect in gift-giving.
R-25	I put answer choice D while the correct answer was C, C is the correct answer choice because the authors state that DNA has two chains and uses evidence to support it. I had but D because I felt that idea was in the passage, but it had no support.
R-33	I put answer choice B while the correct answer was A, A is the correct answer choice because the authors talk about how women can gain existing roles in society. The answer I put is wrong due to the fact that the author never states that traditional roles will have to be given up.
R=35	I put answer choice A while the correct answer was B, B is the correct answer because the author says that the bridge provides a good view for the procession of men. The answer I put is wrong because the bridge is meant for the facts and not to create a reflective mood.
R-36	I put answer choice B while the correct answer was D, D is the correct answer choice because the author notes the women have joined the procession; therefore, it is less exclusive. I chose B because I inferred it was the best answer out of all of them.
37	I put answer choice A while the correct answer was C, C is the correct answer choice because it answers the question as it shows women are joining the procession. I put A because it was the best evidence for my previous choice, which was incorrect.
49	I put answer choice C while the correct answer was D, D is the correct answer choice because answer because passage 2 explains concerns about the passage 1 idea. I picked answer choice C because the second passage showed how impractical the passage one idea was. However, passage 2 was just showing concerns.
51	I put answer choice A while the correct answer was D, D is the correct answer choice because it talks about risky regulations, which supports the answer in the last question. I chose answer A because I didn't know which choice to pick.

W-2	I put answer choice D while the correct answer was B, B is the correct answer choice because answer B provides another example of how farmers address acid whey disposal, which is the main idea of the paragraph. My answer was wrong because it made the paragraph set up so it only showed one resolution. I had picked my answer because it flowed the best, but it should have created a sort of list of examples.
10	I put answer choice B while the correct answer was A, A is the correct answer choice because it successfully communicates that the yogurt keeps people full for a long time. I had picked B because I thought "fulfilled" meant this; however, fulfilled doesn't mean the yogurt will satisfy the hunger.
16	I put answer choice A while the answer was C, C is the correct answer because the semicolon indicates that the idea about early thaw is about to be provided. I had chosen answer A because I didn't know what to pick from A and C. Answer A is wrong because the semi-colon only separates two independent clauses.
19	I put answer choice B while the correct answer was D, D is the correct answer choice because "their" is used to refer to the plural pronouns snow and Ice. I chose answer B because I thought the sentence targeted only snow and forgot about Ice. Therefore, "its" is the wrong answer.
26	I put answer choice B while the correct answer was A, A is the correct answer choice because it effectively starts a list after the words, such as. I chose answer B because I thought that before every list, there should be a semicolon. However, this is not the case when such is used before a list in a sentence.
M-49	I put answer choice A while the correct answer was D, D is the correct answer choice because when you create a hypothetical question of $P(x)$ and divide it by $x-3$ and set up an equation, you should plug in 3 and see that it would be equal to r . R is the remainder which then would equal -2 . I chose to answer A because I had guessed this problem.
57-58	I put answer choices ".02 and 8.51" while the correct answer was "1.02 and 6.11" These are the correct answer choices because 1.02 represents the 2 percent compounds annually, and 6.11 is the difference between the two different percent in the same equation. I had got these questions wrong because instead of putting 1.02, I put .02, which made questions 57 and 58 both wrong.
