Incorrect Question #	Why is my answer incorrect			Why is this the correct answer		
15	I wasn't paying attention to what the question was asking me.			I think the answer is D because the other answers would not go with the X columns.		
22	Genes are really small and you can't see them with a microscope			I think F is the answer because they are the only things you can see with a microscope		
41	I was confused on what the question was asking me.			I think D is the answer because in order to find the relationship, you need the data for sunny days and solar power		
42	Light and sound do not travel at the same speed.			I think the answer is H because light travels faster than sound.		
46	I was confused on this question so I guessed.			I think G is the answer because the sun gives radiation and convection to the earth.		
49	Circuits do not have to do with static electricity.			I think the answer is C because static electricity is made by rubbing two things together.
