Incorrect Question #	Why is my answer incorrect			Why is this the correct answer		
4	I didn't read it properly			$3.9 \times 10^8$ , $4.7 \times 10^5$ , $5.2 \times 10^5$ ↑ Larger than ↑		
9	Didn't know what it was			B because the groups have to be positive		
17	thought the answer was $\frac{1}{8}$ so took a guess			D as it is definitely not greater and not C so it's D		
19	I was confused by the question			C as it is on -8, 6 it would go to 8, -6		
28	I flipped the cards			(2, 3) as it's on (-2, -3)		
31	I was using a complicated method			C because there is 16 possible combinations in $4 \times 4 = 16$		
48	I honestly didn't know how to do it			It's D because they both work in the equation
