

Grade: 4

Category: Order of Operations

Subcategory: Add / Subtract with Parentheses

Worksheet #: 73Q

Find the answer to each question.

1. $45 - 21 - 3 - 5 - 1 =$ _____

2. $42 - (20 - 6 - 1 - 0) =$ _____

3. $(15 - 4 - 2 - 4) =$ _____

4. $(32 - 17) + 8 (55 - 16) =$ _____

5. $12 - (42 - 67) + (35 - 10) =$ _____

6. $2 - (34) + (43 + 7) + 15 =$ _____

7. $23 + 50 + 23 - (3 + 67) =$ _____

8. $5 + 6 - 7 + (62 + 12) =$ _____

9. $64 + 32 + 1 - (43 - 53) =$ _____

10. $23 + 45 - (12 + 23) =$ _____

Subcategory: Add / Subtract with Parentheses

Worksheet #: 73A

Find the answer to each question.

$$45 - 21 - 3 - 5 - 1 = \underline{\hspace{2cm}} 15 \underline{\hspace{2cm}}$$

$$42 - (20 - 6 - 1 - 0) = \underline{\hspace{2cm}} 29 \underline{\hspace{2cm}}$$

$$(15 - 4 - 2 - 4) = \underline{\hspace{2cm}} 5 \underline{\hspace{2cm}}$$

$$(32 - 17) + 8 (55 - 16) = \underline{\hspace{2cm}} 327 \underline{\hspace{2cm}}$$

$$12 - (42 - 67) + (35 - 10) = \underline{\hspace{2cm}} 62 \underline{\hspace{2cm}}$$

$$2 - (34) + (43 + 7) + 15 = \underline{\hspace{2cm}} 33 \underline{\hspace{2cm}}$$

$$23 + 50 + 23 - (3 + 67) = \underline{\hspace{2cm}} 26 \underline{\hspace{2cm}}$$

$$5 + 6 - 7 + (62 + 12) = \underline{\hspace{2cm}} 78 \underline{\hspace{2cm}}$$

$$64 + 32 + 1 - (43 - 53) = \underline{\hspace{2cm}} 107 \underline{\hspace{2cm}}$$

$$23 + 45 - (12 + 23) = \underline{\hspace{2cm}} 33 \underline{\hspace{2cm}}$$
