Grade: 4 **Category:** Division **Sub Category:** Word Problems **Worksheet #:** 2A

Problem 1: There are 36 cookies, and each child gets 6 cookies. How many children are there?

Answer 1: $36 \div 6 = 6$ children

Problem 2: A farmer has 128 apples, and he wants to distribute them equally among 8 baskets. How many apples will be in each basket?

Answer 2: $128 \div 8 = 16$ apples in each basket

Problem 3: There are 72 students in a classroom. They are arranging themselves into groups of 4 students each. How many groups can they form?

Answer 3: $72 \div 4 = 18$ groups

Problem 4: A toy store has 240 stickers, and they want to pack them into packets with 12 stickers each. How many packets can they make?

Answer 4: $240 \div 12 = 20$ packets

Problem 5: A pizza has 32 slices, and each person wants 4 slices. How many people can be served with one pizza?

Answer 5: $32 \div 4 = 8$ people can be served

Problem 6: A garden has 90 flowers, and they are being planted in rows with 6 flowers each. How many rows will there be?

Answer 6: $90 \div 6 = 15$ rows

Problem 7: A baker made 144 cupcakes, and each box can hold 12 cupcakes. How many boxes will be needed?

Answer 7: $144 \div 12 = 12$ boxes

Problem 8: A bookshelf has 96 books, and they are arranging them in stacks with 8 books each. How many stacks will there be?

Answer 8: $96 \div 8 = 12$ stacks

Problem 9: A fisherman caught 135 fish, and he wants to put them in bags with 9 fish each. How many bags will he need?

Answer 9: $135 \div 9 = 15$ bags

Problem 10: A teacher has 63 markers, and each student will get 7 markers. How many students are there?

Answer 10: $63 \div 7 = 9$ students
