Incorrect Question #	Why is my answer incorrect			Why is this the correct answer		
7	Silly mistake, not completely simplified.			A is the correct answer because $3i - 3i$ should cancel out.		
18	I thought it was none of the above because I simplified the equation and then completely forgot to put the square root under the square root.			$2\sqrt{8}xy$ is the answer because x & y are out of the square root. I initially was confused.		
30	I haven't learnt how to do this type of graph before, but now I understand. I guessed on the test.			If you look at the function at where x is 0, 1, & 2 then it shows that in the height line, $y = -2$ every time.		
39	They aren't teaching matrices to me this year, so I guessed.			If you multiply a matrix with itself, the answer is always the matrix. The answer is B^2 .		
49	Silly mistake.			When counted correctly, the answer is 30.
