

## Addition with Base 10 Blocks

Convert the addition problem into base ten block addition. Add the blocks and then solve the addition problem.

25 + 63 =	_____ tens = _____ _____ ones
72 + 11 =	_____ tens = _____ _____ ones
54 + 39 =	_____ tens = _____ _____ ones
18 + 45 =	_____ tens = _____ _____ ones

## Addition with Base 10 Blocks

Answers:

$25 + 63 =$

$$= \begin{array}{l} \underline{\quad} 8 \underline{\quad} \text{ tens} \\ \underline{\quad} 8 \underline{\quad} \text{ ones} \end{array} = 88$$

$72 + 11 =$

$$= \begin{array}{l} \underline{\quad} 8 \underline{\quad} \text{ tens} \\ \underline{\quad} 3 \underline{\quad} \text{ ones} \end{array} = 83$$

$54 + 39 =$

$$= \begin{array}{l} \underline{\quad} 9 \underline{\quad} \text{ tens} \\ \underline{\quad} 3 \underline{\quad} \text{ ones} \end{array} = 93$$

$18 + 45 =$

$$= \begin{array}{l} \underline{\quad} 6 \underline{\quad} \text{ tens} \\ \underline{\quad} 3 \underline{\quad} \text{ ones} \end{array} = 63$$
