

INTRODUCTION

I feel that we should use cloth towels instead of paper towels. We could save so much money and time. Imagine how much money people spend on paper towels in one year, when they could simply buy just one cloth towel. We could save up that money for better things, like charity.

BODY 1

?

Cloth towels are a one time thing. Until they go old it is good to use for as long as you can. But on the other hand paper towels aren't, paper towels are a one time thing, After using them once you go over to throw it away. We also spend less money on a cloth towel than we do paper towels.

BODY 2

Did you know that paper towels are actually bad for our environment? They are hurting our environment because they hold 0.06 lbs of carbon dioxide each, they are collectively giving more to deforestation, global warming, and an increasing waste problem. It is and it is a very bad problem, think of all the times people have used paper towels and now think about how much they impacted our environment. We should be more thoughtful about how we use paper (like in paper towels).

BODY 3

Other people may think that paper towels are more convenient to use. That may be correct in some cases but in this case a cloth towel is worth less, doesn't hurt our environment, and is convenient enough.

CONCLUSION

~~I feel that~~ we should use cloth towels instead of paper towels. It costs less and we could be using that money for people in need. It hurts our environment and if we use cloth towels we can help that. It also is only a one time thing while cloth towels are for as long as they go old.
