|                      | Eva Jain  |  | 7th             | 3/18/23      | Algebra 1  | 7th       | 2006            |
| Incorrect Question # | Why is my answer incorrect  |  |                 |              | Why is this the correct answer   |           |                 |
| 14                   | The formula for the area of a rectangle is $l \times w$ and when $l$ is replaced as that it doesn't make it even. |  |                 |              | The formula for the area of a rectangle is $l \times w$ and when $l$ is replaced with $2l$ it makes the $l \times w$ statement true. |           |                 |
| 42                   | I missed this question by accident.   |  |                 |              | When using the substitution and elimination method for this we can see that $5x$ imply is the right answer.                          |           |                 |
| 43                   | Haven't learned matrices.   |  |                 |              | Haven't learned matrices.  |           |                 |
| 44                   | <del>Haven't learned matrices.</del>  |  |                 |              | Haven't learned matrices.  |           |                 |
| 50                   | Skipped.  |  |                 |              | Since all of the corresponding values of $x$ are on the left and all the values are on the right.                                    |           |                 |
|                      |   |  |                 |              |  |           |                 |
