

	Write here -->	<b>Student's Full Name</b> Saatvik Kesarwani	<b>Student's Grade</b> 11	<b>Today's Date</b> 6/18/24	<b>Test #1</b>	<b>CB or MEP</b>	
<b>Section + Module</b>	<b>Incorrect Question #</b>	<b>Why is my answer incorrect</b>			<b>Why is this the correct answer</b>		
Section 1 Module 1	3	C: This answer is incorrect because I didn't read the entire question. Therefore, I wasn't able to conclude that the model was describing the community			D: This answer is correct because the collaboration between the two groups is what the model <b>shows</b> this key word is a synonym to exemplifies		
Section 1 Module 1	22	B: I didn't think of the rule that if there is a name within two commas the sentence should make sense without the name and the sentence doesn't make sense without the name.			C: This answer is right because if you read the entire sentence then you need the name inside the sentence and not in a comma because without the name the sentence would not make sense.		
Section 1 Module 1	24	C: This answer is incorrect because if you plug in "food while" the sentence doesn't make any sense. I should try to read the entire question before answering.			A: The answer "food:" is the correct answer because it says a statement and then there is supporting details. This means that there needs to be some sort of break point which in this case can be a colon.		
Section 1 Module 1	27	C: If you start a new sentence with the word Though it wouldn't make any sense. Though would fit much better in the sentence before.			A: The word "though" fits much better in the sentence before and since the word "as" is lowercase there needs to be a colon to indicate a supporting claim afterwards.		
Section 1 Module 1	31	C: The phrase "furthermore" isn't correct because that indicates that there is a second statement that is being proposed. This is not the case because they are listing a supporting claim.			D: The phrase "increasingly" is correct because it indicates that something is becoming more common which is the fact that mathematicians are starting to work with other people more.		
Section 1 Module 1	33	B: This answer is incorrect because it just states what both of the people do instead of actually comparing them both.			C: This answer is right because it lists the things that both people do but it also compares both of them using words like "although."		
Section 1 Mod 2	4	A: This answer is wrong because the statement is talking about how fashion can't be correlated with fine arts and this doesn't mean that both of them will "prevail" instead it is saying that critics don't believe that they can associate together in the modern world.			D: This answer is correct because it talks about the intersect which is exactly what the critics don't believe can happen in the modern world.		
Section 1 Mod 2	5	C: Illustrate isn't the right answer because it means to show a supporting reason to a thing. This statement isn't talking about that but instead saying that the society made this predetermined views.			D: This answer shows how the society predetermined these views for people hence, prescribed.		

Section 1 Mod 2	10	A: This answer is wrong because the poem is talking about he is about to go to sleep its not that he is already asleep.	D: This answer is correct because it indicates that he is about to go to sleep and what stops him is that he is thinking about his friend.
Section 1 Mod 2	11	C: This answer is wrong because the text never talks about how he is sympathizing over them.	D: This answer is correct because it talks about how he says that they are all in agreement with the word "unanimity" which indicates that he thinks that they are in union even though the group themselves are clearly not in union.
Section 1 Mod 2	15	B: This answer is incorrect because between both of these years the jump in percents are both the same for the USA and France.	A: This answer is correct because it shows a big jump in USA in the percents while the France percents are barely changing.
Section 1 Mod 2	24	A: The sentence doesn't make sense when you don't put any stop between the words. This is why you need to add some stop in between the words.	C: This sentence is correct because it stops in between and the new sence makes clear sense.
Section 1 Mod 2	27	D: This mistake I also made before the sentence doesn't make sense without the name of the biologist and the name is important in this context.	C: This answer is correct because the name is needed to make the sentence make sense.
Section 1 Mod 2	28	A: The answer "For instance" doesn't make sense because it isn't showing an example of what the previous sentence said but showing a result of what the previous sentence said.	D: This answer is correct because it explains how the result of the characteristics of a spider allows it to perform tasks like that.
Section 1 Mod 2	32	D: I got this answer correct on my paper but put the wrong answer in the module.	B: This answer is correct because it clearly explains the word "flauna" and its context in the person's work.
Section 2 Mod 2	17	A: I only looked at the percent and saw that it was less than 1% which I thought that meant that the value would decrease	C: The right answer is increasing exponentially because the question says <b>increases</b> by a factor of 0.49%
Section 2 Mod 2	26	A: I didn't consider the fact that the question said that the second equation was already prependicular to the equation above. This means that the slope is already taken care of. I didn't know this and I put -2 because a perpendicular equation is -1/2 of the normal slope.	B: The right answer is B because the slope is just multiplied by 2 because the x value was doubled in the equation above. There is no negative applied.
