7. There are 4 shelves in a bookcase, and each shelf has 9 books. How many books are there in the bookcase in total?
8. Sarah has 10 pencils. She gave 3 pencils to her friend and then bought 5 more. How many pencils does Sarah have now?

Grade: 2 **Category:** word problems **Sub Category:** Mixed just add. / sub. / multi. **Worksheet #:** 21A

1. Mia had 14 candies. She gave 5 candies to her friend and then received 3 more from her teacher. How many candies does Mia have now?

Answer: Mia has $14 - 5 + 3 = 12$ candies.

2. There are 6 apples in a basket. If Sarah takes 3 apples and Jack takes 2 apples, how many apples are left in the basket?

Answer: There are $6 - 3 - 2 = 1$ apple left in the basket.

3. Sam has 4 boxes of stickers. Each box contains 8 stickers. How many stickers does Sam have in total?

Answer: Sam has $4 \text{ boxes} \times 8 \text{ stickers/box} = 32$ stickers in total.

4. There are 15 birds sitting on a tree branch. If 6 birds fly away, how many birds are left on the branch?

Answer: There are $15 - 6 = 9$ birds left on the branch.

5. A farmer planted 7 rows of carrots, and each row had 5 carrots. How many carrots did the farmer plant in total?

Answer: The farmer planted $7 \text{ rows} \times 5 \text{ carrots/row} = 35$ carrots in total.

6. There are 20 children in a class. If 8 children go home early, and 6 more children join later, how many children are in the class now?

Answer: There are $20 - 8 + 6 = 18$ children in the class now.

7. There are 4 shelves in a bookcase, and each shelf has 9 books. How many books are there in the bookcase in total?

Answer: There are $4 \text{ shelves} \times 9 \text{ books/shelf} = 36$ books in the bookcase.

8. Sarah has 10 pencils. She gave 3 pencils to her friend and then bought 5 more. How many pencils does Sarah have now?

Answer: Sarah has $10 - 3 + 5 = 12$ pencils.
