Incorrect Question #	Why is my answer incorrect			Why is this the correct answer		
18	I did not learn the unit. When you look at the quadrilateral family, All squares is always rectangle.			One of the properties of a Square is it <del>has</del> has 4 right angles. But a rhombus <del>that</del> does not.		
19	I also did not learn the unit. I thought we keep it there and then rotate it.			When we're rotating, we also move it 2 times.		
23	Same thing as 18. The quadrilateral family say that every rhombus is sometimes a square.			If we look at the quadrilateral family tree then every rhombus is a Parallelogram		
28	I thought it had to be the same when I reflected it.			I used a formula. If you're reflecting across the y-axis, keep the y value. Flip the x sign.		
31	I thought we just multiply once.			We multiply the options by 4.		
39	I counted it wrong.			look at the stem and leaf plot
