

Grade: 3 **Category:** Word Problem **Sub Category:** Measurement word problem (Mass & Weight word problem) **Worksheet :** 5Q

1. At the fruit stand, there were 9 melons left in a cardboard box. Each melon weighs 5 pounds. What is the total weight of the melons in the box?	2. At the pet shop, a small pack of birdseeds is 8 grams, and a large pack of birdseeds is 12 grams. What is the total weight of 5 small packs and 2 large packs of birdseeds?
3. 3 cell phones weigh 24 ounces. What is the weight of one cell phone?	4. There are two eggs on the counter. The large egg weighs 56 grams and the small egg weighs 47 grams. How much heavier is the large egg?
5. In a drink store, there are 56 ounces of sugar in a container. If Kenneth uses 3 ounces of sugar each for 2 cups of fruit tea, how much sugar is left in the container?	6. Jack lifts a bag that is 35 pounds with his right hand and lifts another bag that is 17 pounds with his left hand. How much weight is he carrying in total?
7. A box of 12 cookies is 360 grams. What is the weight of 2 cookies?	8. A dolphin is fed 15 kg of fish in a day. If it is fed 3 times a day, how much fish was fed to the dolphin at each meal?

Grade: 3 **Category:** Word Problem **Sub Category:** Measurement word problem (Mass & Weight word problem) **Worksheet :** 5A

<p>1. At the fruit stand, there were 9 melons left in a cardboard box. Each melon weighs 5 pounds. What is the total weight of the melons in the box? <u>Answer:</u> $9 \times 5 = 45$ The total weight of the melons left is 45 pounds.</p>	<p>2. At the pet shop, a small pack of birdseeds is 8 grams, and a large pack of birdseeds is 12 grams. What is the total weight of 5 small packs and 2 large packs of birdseeds? <u>Answer:</u> $(5 \times 8) + (2 \times 12) = 40 + 24 = 64$ The total weight of 5 small packs and 2 large packs is 64 grams.</p>
<p>3. 3 cell phones weigh 24 ounces. What is the weight of one cell phone? <u>Answer:</u> $24 \div 3 = 8$ The weight of one cell phone is 8 ounces</p>	<p>4. There are two eggs on the counter. The large egg weighs 56 grams and the small egg weighs 47 grams. How much heavier is the large egg? <u>Answer:</u> $56 - 47 = 9$ The large egg is 9 grams heavier than the small egg.</p>
<p>5. In a drink store, there are 56 ounces of sugar in a container. If Kenneth uses 3 ounces of sugar each for 2 cups of fruit tea, how much sugar is left in the container? <u>Answer:</u> $56 - 3 - 3 = 50$ There are 50 ounces of sugar left in the container.</p>	<p>6. Jack lifts a bag that is 35 pounds with his right hand and lifts another bag that is 17 pounds with his left hand. How much weight is he carrying in total? <u>Answer:</u> $35 + 17 = 52$ He is carrying 52 pounds in total</p>
<p>7. A box of 12 cookies is 360 grams. What is the weight of 2 cookies? <u>Answer:</u> $360 \div 12 = 30$ The weight of 1 cookie is 30 grams. $2 \times 30 = 60$ The weight of 2 cookies is 60 grams.</p>	<p>8. A dolphin is fed 15 kg of fish in a day. If it is fed 3 times a day, how much fish was fed to the dolphin at each meal? <u>Answer:</u> $15 \div 3 = 5$ The dolphin was fed 5 kg of fish each time</p>
