|                      | Diya Thevendiya                         | 6th  | 04/15/07     | Math        | 7th       | 2007            |
| Incorrect Question # | Why is my answer incorrect              | Why is this the correct answer   |              |             |           |                 |
| 78                   | Because I thought it was inverse.       | The correct answer is G because they said $(\frac{3}{4} \times 9) + 0$ so the answer is the same thing |              |             |           |                 |
| 10                   | Because I missed a zero                 | The correct answer is F because I thought $0.7 = 0.07$ because it would make sense                     |              |             |           |                 |
| 12                   | This is correct                         | This is correct  |              |             |           |                 |
| 17                   | I counted a side twice                  | The correct answer is C because it equals 8 sides  |              |             |           |                 |
| 26                   | I need help... I did not learn this yet | I did not learn this   |              |             |           |                 |
|                      |   |  |              |             |           |                 |
|                      |   |  |              |             |           |                 |
