3. Cloth towels are much more economical, long-lasting, and are eco-friendly.

4.

Intro

The best towels that you can use are cloth towels. ~~Cloth towels~~ ^{They} are much more economical, long-lasting, and are eco-friendly.

~~BP1-Cloth towels are economical~~

Cloth towels are more economical because they are much more inexpensive compared to the standard disposable paper towel. ^{relatively} In the *Ecofriendlyminimalist* article on *Paper towels vs cloth towels: Which is better?* It has been stated that the price of a paper towel is usually \$2.16 per roll, versus a one time investment of a cloth towel which can be used over and over again, with cleaning only necessary from time to time. ~~This shows how cloth towels overpower paper towels.~~ ^{reasonable inference.}

~~BP2-Cloth towels are long-lasting~~

Cloth towels are extremely durable for long periods of time, lasting much longer than a single use paper towel. ^{No strong adj.} While some might disagree saying paper towels last much longer than cloth towels, this wouldn't be the case. As said in *Cloth shop towels vs paper towels: Which should you use?* Cloth towels are much more resistant than paper towels and can be used multiple times after laundering, unlike paper towels.

~~BP3-Cloth towels are eco friendly~~

Due to cloth towels being much more sturdy, low-cost, and reusable, cloth towels are also environmental. Paper towels are only single use and are high-cost when bought frequently, unlike the multiple use cloth towels being comparatively cheaper than paper towels. Paper towels also conduct around 0.06 pounds of carbon emission every year, as stated in a *AlSCO* [★] *Uniforms* article on *Cloth towels vs. Paper towels*. Though it might seem a small amount, if we stop using paper towels it can help us relatively lower our carbon footprint.

Conclusion

~~In the end~~, cloth towels have been shown to be more resilient, enduring, and ecological, thus leading them to be far superior than its counterparts, the paper towels.
