

Hello Academies of Loudoun,

I am fascinated by the variety of clubs you guys have to offer. Some clubs I would like to join are Green Earth, Marine Sciences, Red Cross Club, Academies Club Fair, and lastly, Muslim Club.

I would like to join the Green Earth club because I don't think that people are treating the earth unfairly. People are polluting the air, also littering and I would like to help fix this. I would come visit every Monday to express my ideas on helping us clean out the earth.

I am very interested in the Marine Sciences club because I always loved learning about sea animals and what's under the ocean that we can't see. The ocean is in danger though due to people throwing their trash on the beach, it flows into the ocean and could hurt the living creatures. I have been watching ocean documentaries all of my life so I feel like if anyone has questions, I will have answers. Also if we conserve water the water we waste won't flow into the ocean.

The Muslim club has really brought my attention because I am Muslim. I am pretty strong in my Islamic studies and I am sure to help teach anything that my fellow classmates don't know. I can also teach my classmates how to have a proper accent when reading the Quran.

When I was a younger kid my parents took me to my first fair and I loved it, so that's why I chose the Academies Club Fair. Fairs usually have roller coasters, hot dogs, pizza, funnel cakes, etc. Though when I attend I will help improve the fair to make it the best experience ever like selling foods fairs don't usually have or selling traditional foods.

Lastly, the Red Cross Club is the last club I was gripped by. When I watch TV some ads come on with kids who have suffered cancer or have special needs. I feel bad for these kids and I want to help by assisting these kids or adults who need help.
