Incorrect Question #	Why is my answer incorrect	Why is this the correct answer				
1	Because the expression has 4 terms	D, Because the express has 4 terms.				
3	Because the ... and its ...	G Because you have to bring like terms together				
4	there are more than or less than 3 terms	C, Because there are only 2 terms w/ variables ...				
14	Because there are ...	b, because the -3 and 3 cancel out				
15	Because there is ...	b, because 5×-2 is -10, so the answer must be $82 - 10$.				
24	Because the area of a parallelogram is a different formula	d, because $\frac{4 \cdot 3}{2}$ is 12 inches ²				
27	Because it was a common guess.	A, because $360 - 230$ is 130° .

Incorrect Question #	Why is my answer incorrect	Why is this the correct answer				
28	because the sum is 180° , so if one of the angles is 60° , then $180 - 60 = 120$, $120 \div 2$ is 60 .	b) 				
34	$50 + 130 = 180$, and 180° is supplementary	b) because the sum of the angles is 180°				
36	because 90° is half of a supplementary angle.	a) because 60 is half of a supplementary angle.				
40	Because I was thinking of something else.	b) because $2(6+8)$ is 28 , so that's the answer.				
42	there is something else.	d) because it is greater.				
43	Because there was an error with calculation.	A,				
44	Because there is "2" in all terms.	b) because the values x^2 and then $2x^2$ are equal.				

Question
47

Because there
is an answer.

A, because the
values are similar.
