Incorrect Question #	Why is my answer incorrect			Why is this the correct answer		
8	I got the points mixing up			J is correct because they are both at the same distance and at the same level		
13	I guessed on this question			A is correct because it turns from chemical and then it becomes thermal		
22	I was confused, so I guessed			F is correct because cells are easy to see with a microscope		
25	The energy from the sun increase when there is air pollution			B is correct because when the air is polluted, acid rain can occur		
29	I guessed on this question			A is correct because when you combust something, it is hot and bright		
33	I guessed on this question			C is correct because cattle produce tons of waste and the water would be full of bacteria.		
37	I was confused on this question			B is correct because in order for photosynthesis to happen, plants need oxygen.
