Video games are pleasurable.
It is a great activity in my free time.

Question 3:
According to the CDC, every American has more than ~~5~~ *five* hours of freetime every day.

Question 4:
I do many things in my free time but the most pleasurable thing I do is playing video games with my friends.

Question 5:
According to the CDC, every American has more than ~~5~~ hours of freetime every day. I *have*
~~live a busy life doing stuff that I need to do~~ *a busy school* but I also have lots of free time. I do many things in
my free time but the most pleasurable thing I do is playing video games with my friends.

One reason why I like to play video games is because my friends give me a fun
company. Normally whenever I hang out with my friends it's normally in school where learning is
required which makes it not a fun time. Since I play one of the most popular games right now
lots of my friends play it which means that we are all skilled. This makes it a lot easier to win a

game and winning is joyful. Playing with friends is also fun because you can talk to them and have a nice conversation using your microphone.

Another reason I like to play video games is because it relieves stress from real world problems. Video games take my thoughts away from tests in school and the homework that I didn't do. Video games are also a fun and relaxing way to enjoy your free time with your friends. There are many things that can cause someone stress like school, extracurricular activities, or maybe even sports but when your playing video games all of that goes away and you just have a good time.

Some people like professional gamers will think that video games aren't enjoyable and it causes them stress. They think this about video games because winning is important to them because in tournaments there is money on the line so there is a lot of pressure to perform well. This causes them to endure stress whenever they lose because they could have won lots of money but they didn't. Professional gamers also might not like video games because they need to do it for a living which doesn't make it a fun activity. They also might get sick of their game and sometimes even quit playing video games forever.

Video games are a pleasurable activity that you can play with your friends to have fun and relieve stress. Many people are very busy but there is always time for Video games. Video games are a very effective way to relax during your free time.
